

Benefits Support™

Benefits-Support™ is part of E³ Employer Solutions™

E³ = Encourage. Empower. Exchange.

Today's businesses are looking for answers to smaller budgets and man-power shortages along with increased work-flow demands. Benefits-Support™ allows businesses to supplement their HR departments by utilizing the skilled, experienced services of our benefit consultants.

Benefits-Support™ is customized because you choose how much, or how little, benefits help you need. Working with you, we can customize a solution to fit your budget as well as your company demands.

You may choose services such as new-hire enrollment, annual benefit enrollments, claims and billing assistance, employee changes, eligibility assistance and various data input. We are able to generate valuable management reports, assist with premium reconciliation and remittance along with other necessary benefit functions.

Benefits-Support™ has experience creating and maintaining benefits web sites which are online micro-sites containing information customized to reflect your benefits portfolio. These online benefits gateways are where all your company's general benefits information, forms and contacts can reside in a secure, password-protected environment. Benefits-Support™ is experienced with online, benefit enrollment systems too. That means we can assist with, or provide, online enrollment for your company to help streamline the eligibility and enrollment processes and increase efficiency.
